CLIENT PROJECT | B2B SOFTWARE · LEAD GENERATION

Reduce the effort of keeping track of unpaid invoices.

A four-email cold sequence for InvoiceFlow, a B2B invoicing software company, written to turn cold prospects into booked demos.

PROJECT 3 | JULY 2025 | COPYWRITER: ABDUL TAHIR

Conversational copy | Curiosity-led hook | Demo-focused journey

AUDIENCE	Teams that send invoices and follow up on late payments.
THE BRIEF	InvoiceFlow had a strong product, but its outreach explained it through features. The emails listed what the software does and gave a finance or operations reader little to recognise from their own week.
GOAL	Convert cold prospects into booked demos through conversational, curiosity-driven copy.
MY APPROACH	I built the sequence around one task: following up on an overdue invoice. The emails ask how the team handles it today, describe the checks involved, and then offer a demo that follows a single invoice from start to finish.
DELIVERABLES	A four-email sequence with a focused demo invitation and a polite final email.

How the sequence builds

01 **Lead with a familiar problem**
Email 1 asks how the team keeps track of what's paid, what's overdue and who needs a reminder.

02 **Make the pain tangible**
Email 2 uses three short questions (Did someone send a reminder? Did the client reply? Who has the next step?) to describe the confusion of chasing a payment.

03 **Give the demo a clear scope**
Email 3 narrows the walkthrough to one example, an overdue invoice, so the reader knows what they would be agreeing to.

The sequence

Four emails over 13 days. Emails 2 to 4 continue in the same thread.

01 / EMAIL 1 • DAY 1
Lead with a familiar problem

Hi [First Name],

Once an invoice goes out at [Company], how does your team keep track of what's paid, what's overdue, and who needs a reminder?

InvoiceFlow helps bring invoice tracking and payment follow-ups into one workflow, so your team can spend less time checking spreadsheets and email threads.

Would a quick look at that workflow be useful?

[Sender Name]
InvoiceFlow

02 / EMAIL 2 • DAY 4
Make the pain tangible | Same email thread

Hi [First Name],

The awkward part of chasing an invoice is often figuring out what's already happened.

Did someone send a reminder? Did the client reply? Who's handling the next step?

That's the workflow I'd focus on in an InvoiceFlow demo: checking the invoice status and seeing what needs attention next.

Is that something your team currently handles manually?

[Sender Name]
InvoiceFlow

03 / EMAIL 3 • DAY 8
Make the demo specific | Same email thread

Hi [First Name],

If you're open to a demo, we can keep it focused on one example: an invoice that's overdue.

We'd walk through how your team would find it, review its status, and handle the follow-up in InvoiceFlow.

That should give you a practical sense of whether it fits your process.

Would you be open to taking a look next week?

[Sender Name]
InvoiceFlow

04 / EMAIL 4 • DAY 13
Give an easy exit | Same email thread

Hi [First Name],

I'll wrap up here.

If your current invoicing process works well, fair enough.

If tracking unpaid invoices and coordinating reminders still takes more time than you'd like, we can show you how InvoiceFlow handles that workflow.

Worth revisiting, or should I leave it here?

[Sender Name]
InvoiceFlow

Copy decisions

ONE WORKFLOW, NOT A FEATURE LIST	Every email returns to the same task. The product appears as the place where that task happens.
QUESTIONS BEFORE CLAIMS	The early emails ask what the reader's process looks like instead of telling them what is wrong with it.
A SMALL, SPECIFIC ASK	A demo built around one invoice sounds shorter and easier to agree to than a general product tour.
AN EASY EXIT	The last email accepts that the current process may already work well, and leaves the decision with the reader.

Sequence at a glance

DAY	EMAIL	WHAT IT DOES
Day 1	Lead with a familiar problem	Asks how the team tracks paid, overdue and reminder-needed invoices.
Day 4	Make the pain tangible	Describes the confusion of chasing an invoice and the workflow a demo would cover.
Day 8	Make the demo specific	Offers a focused demo around one overdue invoice.
Day 13	Give an easy exit	Closes politely and asks whether to revisit or leave it.

Need a sequence for your business?

Share your offer, target reader and the next step you want them to take.
