CLIENT PROJECT | B2B SAAS · SIGNAL-BASED PROSPECTING

One growth signal. One short email.

A plain-text outreach email for ScaleOps, a B2B SaaS company, sent only when a prospect shows a specific growth signal.

PROJECT 4 | AUGUST 2026 | COPYWRITER: ABDUL TAHIR

Trigger-based targeting | Short plain text | Low-friction CTA

AUDIENCE	VP-level sales leaders at companies showing a growth signal, such as hiring a new SDR team.
THE BRIEF	ScaleOps was sending long, five-paragraph emails built on HTML-heavy templates with tracking links. VP-level prospects were tuning them out, and deliverability was suffering.
GOAL	Keep the emails out of spam and give VP-level prospects a reason to reply.
MY APPROACH	I cut the email back to a few lines of plain text, with no links or images, and tied each send to a real trigger. The email goes out only when the prospect shows a growth signal, so the first line explains why it arrived.
DELIVERABLES	A signal-triggered, plain-text outreach email.

Three changes

01 Trigger-based targeting
The email is sent only when a target company shows a specific growth signal, for example hiring a new SDR team.

02 Short plain text
Around 40 words, no formatting, written to be read on a phone in a few seconds.

03 No links or images
Removing them reduces spam-filter risk and helps protect inbox placement.

Email sample

Plain text, no links, no images.

EMAIL SAMPLE

Triggered by an SDR hiring signal

Subject: SDR hiring

Hi [First Name],

Saw you just brought on 4 new SDRs this week. Nice work.

Usually, scaling that fast breaks lead routing—reps end up wasting hours doing it manually.

We built a lightweight backend tool at ScaleOps to fix that exact bottleneck.

Worth a look?

Reading the email

SUBJECT LINE	“SDR hiring” names the signal, so the reader sees the reason for the email straight away.
OPENING LINE	Acknowledges the growth signal with a short congratulation instead of a generic compliment.
MIDDLE LINE	Names the problem that often follows fast hiring: lead routing.
CLOSING LINE	Connects ScaleOps to that one bottleneck, with no feature list.
CTA	A three-word question that asks for a look, not a call, so replying takes almost no effort.

Copy decisions

SIGNAL BEFORE PITCH	The hiring signal explains the timing and gives a VP a reason to read past the first line.
ONE PROBLEM ONLY	The email names a single bottleneck instead of describing the product.
WRITTEN FOR MOBILE	The whole message fits on one phone screen without scrolling.
PLAIN TEXT, NO LINKS	It avoids the HTML formatting and tracking links that were hurting the client's deliverability.
A SMALL ASK	The closing question is easy to answer and doesn't commit the reader to anything.

Need a sequence for your business?

Share your offer, target reader and the next step you want them to take.
